## Toursit Attractions

### **BANFF GONDOLA**

With six stunning mountain ranges and the sweep of the Bow Valley before you, views from the Sulphur Mountain summit are nothing short of breathtaking. And there's much more to discover in a state-of-the-art building that will heighten your senses at every turn. The Banff Gondola now gives visitors more to see, do and learn than ever before with state-of-the-art facilities providing everything from passive observation to hands-on interactive experiences. Combining an unparalleled rooftop view, expansive interpretive area, a highly-immersive specialty theatre, private event facilities, retail space, and all-new food and beverage offerings, the Banff Gondola remains Banff's number one must-see attraction and

### **Ojai Trail Facts**

Ojai has over 200 miles of hiking and biking trails, with over 80 miles dedicated solely to mountain biking! Most trails border working farms or ranches, so please take the time to learn your route before going, and pay careful attention to trail markers. Ojai trails are mostly self maintained, so if you see a problem, try to fix it! If the problem is a large one, contact one of the local cycling clubs to let them know, each month they have a trail-repair day that is spent maintaining the trails you know and love!

"You'll kick yourself if you miss the Gondola ride to Sulfur mountain. The view was breathtakingly beautiful."

### TRAIL INFO

Trail type:	Single track
Elevation:	2000 ft
Length:	14.5 miles
Skill level:	beginner to intermediate

If you are looking for great scenery and a great workout without all the technical difficulty of other trails, Northridge Loop is for you. The ridge runs east to west, with Ojai Valley on one side and Rose Valley on the other. The trail features amazing views of both valleys plus the Los Padres National Forest.

There are a total of 6 trail heads spread out over the 14.5 mile loop, so there are plenty of places to get on or off the trail. Hiking is permitting along all trails, so ride with caution and don't override your stopping power.
